

Anabel Villalobos

SOFTWARE ENGINEER

ABOUT ME

My primary focus currently is becoming a better Developer on various tech stacks. I am both driven and self-motivated, constantly seeking to learn new technologies and frameworks. I am super eager to prove my value and talent at a company and love working on teams who strive to create and keep each other motivated.

SKILLS

PROJECTS

CAMPLIFE

(JAVASCRIPT, EXPRESS, REACT / REDUX, HTML5, CSS, SEQUELIZE, POSTGRESQL, FAKER)

AN APPLICATION BASED OFF OF HIPCAMP. WHERE YOU CAN HOST AND BOOK CAMPSITES.

- Utilized onClick functions to upload multiple images at a time when hosting a campsite.
- Utilized URL.createObjectURL() method to convert each local image file to storable data.
- Created a modal with multiple pages using React useState variables and React useContext.
- Used React Link built-in component to send review data as props to path location.

CROWN CLOTHING

(JAVASCRIPT, REACT / REDUX, HTML5, CSS, SASS, STRIPE, FIREBASE)
AN E-COMMERCE CLOTHING APPLICATION

- Utilized Stripe to take customer payments.
- Utilized Firebase for data storage and authentication.
- Created a user friendly interface for easy site navigation.
- Utilized the styled components library for styling

EVENTTODO

(PYTHON, JAVASCRIPT, FLASK, REACT / REDUX, HTML5, CSS, SQLALCHEMY, POSTGRESQL, FAKER)

WHERE YOU CAN PLAN AROUND WORK AND OTHER IMPORTANT PRIORITIES TO BE ABLE TO ATTEND MUSIC EVENTS.

- Utilized setInterval function within React useEffect hook to build an image carousel background for login/sign up pages.
- Created custom error validations in the Flask backend and sent them forward using JSON format.
- Built a custom loading page animation with CSS keyframes, utilizing a setTimeout in a useEffect hook to manipulate page loading state in the App component.
