PROJECTS

CAMPLIFE

<https://camp-life.onrender.com/> (NODE/JAVASCRIPT, EXPRESS, REACT / REDUX, HTML5, CSS, SEQUELIZE,

POSTGRESQL, FAKER)

AN APPLICATION BASED OFF OF HIPCAMP. WHERE YOU CAN HOST AND BOOK CAMPSITES.

- Utilized onClick functions to upload multiple images at a time when hosting a campsite.
- Utilized URL.createObjectURL() method to convert each local image file to storable data.
- Created a modal with multiple pages using React useState variables and React useContext.
- Used React Link built-in component to send review data as props to path location.

EVENTTODO

<https://event-to-do.onrender.com/login> (PYTHON, JAVASCRIPT, FLASK, REACT / REDUX, HTML5, CSS, SQLALCHEMY, POSTGRESQL, FAKER)

- Utilized setInterval function within React useEffect hook to build an image carousel background for login/sign up pages.
- Created custom error validations in the Flask backend and sent them forward using JSON format.
- Built a custom loading page animation with CSS keyframes, utilizing a setTimeout in a useEffect hook to manipulate page loading state in the Appcomponent.
